

Happy Holidays to Friends and Family.

1993 has been a year of many different experiences. Mary is still teaching German; finishing up her commitment to the New York State Association of Foreign Language Teachers as Immediate Past President; and very much enjoying watching Erika grow and develop. In September and October she once again helped host 16 exchange students from Dresden, Germany along with 2 of their teachers. They were a charming and very interesting group of people. She is still working with the NYS Education Department on Frameworks for Languages Other Than English for the years 2000+ - a somewhat frustrating, yet also satisfying project that takes her to Albany monthly. She has co-written an article on that topic too. In September she spent 4 days in the hospital with a bleeding ulcer, so had been teaching 2 classes per day until 12/13. Then will be working full time again.

Erika, 3 years old on December 17, continues to be a marvel to watch. She is attending the Montessori School of Rochester in the Toddler Program and has been accepted into the Preschool Class in January. She likes it very much and the whole family is pleased with the program. The Myers grandparents and aunts and uncles along with the Dzuiba grandparents play an important role in her life and we enjoy special times together. Tom's sister Mary K. and her husband Jim have a new baby daughter and Erika helps with Cousin Katherine, whenever we get together. She is hysterical with shoes, loving to wear them, try them, buy them and tie and untie and buckle and unbuckle them. A real shoe queen! Singing is also a big way to spend time and helping in the garden was a hit too. Life with a toddler is always an adventure.

This has been a great year for Tom.. In late spring, Tom's company, Interactive Television Associates, Inc. moved offices to 1250 Scottsville Road. The new offices are bigger and have great facilities. Work is still enjoyable but business has been off due to the current Kodak climate. ITA has taken this opportunity to developed a vertical market product for continuous form laser printers from Output Technology Corporation. ITA also acquired the rights to sell the DIT 3.2 File Transfer Tool which it developed for Kodak. Sales for both products have just begun.

Our letter is late, but our wishes for you and yours are sincere. We hope your holidays were lovely and a healthy and happy 1994 to all.
